

+ summary

Highly motivated and detail-oriented software developer dedicated to delivering exceptional results. With a proven track record of successfully defining requirements, designing, implementing, testing, and deploying complex front-end and back-end web applications using a diverse set of programming languages and cutting-edge technologies, I bring a wealth of experience to every project.

As a versatile developer, I have acquired a breadth of knowledge across various technologies and frameworks. I leverage this expertise to approach problems from different angles, identifying optimal solutions tailored to specific project needs. From crafting elegant user interfaces to architecting robust back-end systems, I possess the versatility and adaptability required to tackle complex development tasks effectively. Beyond technical proficiency, I excel in collaborating with cross-functional teams, effectively communicating complex ideas, and translating requirements into actionable plans. I thrive in fast-paced, dynamic environments, adapting swiftly to evolving project scopes while maintaining a keen eye for detail.

I am able to deliver high-quality software solutions that meet project requirements efficiently. Committed to staying current with the latest industry trends and continuously expanding my skill set, I actively seek opportunities to broaden my expertise and remain at the forefront of technological advancements.

A collaborative team player, I bring excellent communication skills and a positive attitude to every project. I enjoy working with diverse teams, fostering a collaborative and inclusive environment that drives innovation and produces outstanding results.

Driven by a passion for software development, I am dedicated to continuously honing my skills and exploring new possibilities. With a strong commitment to delivering excellence, I am eager to contribute my expertise and drive impactful outcomes as part of a forward-thinking team.

+ employment

WOB.ag

Assistant Marketing Technology

Mar. 2022 to Current

Currently interning at wob.ag, a web development company specializing in creating websites for clients with large customer bases. During my internship, I have gained hands-on experience with Pimcore CMS, as well as contributed to client website development using React and JavaScript.

AK Advertising

Jr. web developer

Nagpur
Feb. 2016 to Mar. 2018

Transitioning from the support department, I immersed myself in the world of front-end development while also gaining exposure to back-end technologies during the development of the company website. Working collaboratively in a team of seven, I acquired extensive practical knowledge of JavaScript and React.

Highlights of my work include:

- Successfully implementing a shop system for a client's website.
- Developing a Single-Page Application (SPA) using React, significantly enhancing the loading time and overall performance of the client's website.
- Enhancing a client's website by integrating a Firebase database, transforming it from static book data display to dynamic functionality.
- Implementing client-server communication utilizing RESTful APIs.

Through these experiences, I honed my front-end development skills and gained valuable insights into back-end technologies and project collaboration.

IT Consultant

June 2014 to Feb. 2016

Nagpur

As an IT support professional, my role encompassed providing technical assistance, resolving networking issues, implementing software solutions, and conducting hardware repairs. I took responsibility for assembling and maintaining office systems, acquiring valuable knowledge from my teammates in areas such as product maintenance, hardware networking, and project cost and time management.

+ certificate

- University of Michigan- Prof. Colleen van Lent · Interactivity with JavaScript
- Johns Hopkins University-Prof. Yaakov Chaikin · HTML, CSS, and Javascript for Web Developers
- Udemy-Vlad Budnitski · Git & GitHub
- EdYoda Digital University-Qaifi Khan · HTML5 – Basics to Advanced
- Maximilian Schwarzmuller · Javascript –the complete guide

+ languages

- English (fluent)
Reading C2 , listening-C2, speaking C2, writing-C2
- Hindi(native)
- German(beginner)
A1

+ education

- SRH Hochschule Heidelberg Oct. 2021 to Current
Currently pursuing my master in Applied Computer Science
- Nagpur University Aug. 2018 to Aug. 2021
Bachelor of computer application 2021
- Ujjwal Jr. Collage Mar. 2012 to Mar. 2014
- Pandit Baccharaj Middle School Mar. 2005 to Mar. 2011

+ projects

- Blogger

Developed a user-friendly website allowing users to select templates and create custom blogs. Leveraging Vue.js, we built a dynamic and interactive platform where users could easily customize their blogs. To ensure scalability and portability, we containerized the application using Docker, streamlining the deployment process and enhancing its overall efficiency.
- SmallPaws

Developed an app for a pet adoption platform, allowing users to upload and browse pet information available for adoption, free of charge. Utilizing React, I created an intuitive and responsive front-end interface, providing a seamless user experience. The app utilized Firebase for database management and user authentication, ensuring secure and reliable data storage and access. This project showcases my expertise in front-end development, database integration, and user authentication implementation.
- INSTAGRAM CLONE

Custom Made Social network with all features of Instagram. made using react
- Flight Price

Developed a backend application with a RESTful API using Express and Node.js. This application enables users to fetch current flight prices and check flight timings. Leveraging the Skyscanner API for datasets, I implemented robust functionality to provide accurate and up-to-date flight information. The project showcases my proficiency in backend development, API integration, and data manipulation.
- Hotel Bidding

Developed a hotel management app using TypeScript, enabling users to submit quotations and receive bids from various hotels in their vicinity. Leveraging Node.js and MongoDB, I built a robust backend system that facilitated seamless communication between users and hotels. The app showcased my proficiency in TypeScript, backend development with Node.js, and database management with MongoDB. Through this project, I demonstrated my ability to create efficient and scalable solutions for the hospitality industry.
